Period: Early Jurassic (200 to 190 million years ago)

Fossils Found: Western United States and possibly China

Animatronic Size: 16.4 feet long x 3.3 feet wide x 6.6 feet high

- 🦖 Dilophosaurus was a fast-moving, meat-eating dinosaur that walked on two legs.
- 🦖 Dilophosaurus was an agile hunter that used its large, sharp claws to grab prey and tiny, sharp teeth to tear it apart.
- 🦖 Unique to Dilophosaurus is the double head crest, which was most likely only on males and used for attracting females.
