## Junior Animal Care Specialist

Being an animal care specialist takes careful preparation. Here are some things you need to know so that you can be prepared to work side by side with your Junior Animal Care zoo crew:

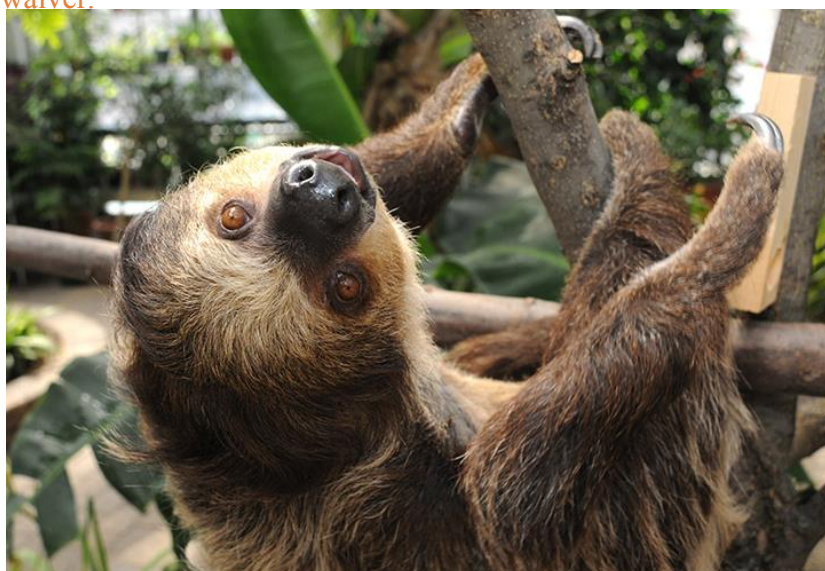

Participants must be in relatively good physical condition. It is important that you are able to go up and down stairways at a moderate pace and are able to kneel for up to 15 minutes at a time.

Communication between you and the care staff is crucial. You must be able to read, speak, and understand English without the use of an interpreter. If you are unable to participate in the program without an interpreter, please call (708) 688-8338.

You must be attentive. Although the animals are comfortable working with their human caregivers, they are still wild animals and their behavior is unpredictable. It is important that you pay close attention to the guidance and instructions of the animal care specialist. Never enter any animal area without direction from care staff. Always wait for instructions from staff before approaching any of the animals.

All participants are required to present a completed and signed liability waiver (page 4).
